Personal Info

Motivated and skilled Software Engineer with a strong passion for software development, cybersecurity, and full-stack system design. With strong expertise in modern programming languages, frameworks, and databases, I build robust authentication systems. I consistently build scalable, production-ready solutions from the ground up.

Currently working towards my bachelor's degree in Software engineering, I am driven by a passion for continuous learning, problem-solving, and a strong growth mindset and a commitment to delivering professional, high-quality solutions.

Education

Primary Education 2016 - 2018
